

GRANT COUNTY COMPREHENSIVE PLAN UPDATE

March 18, 2026

Comprehensive Plan Update

- Grant County has started our mandatory 10-year comprehensive plan update
 - Individual interviews with stakeholders
 - First open house held in Moses Lake on 1/22/26
 - Second open house scheduled in Mattawa on 4/30/26
- County has convened regular meetings with representatives from cities to determine population projections and assign housing allocations
 - Awaiting the land capacity analysis data from cities

Siting Industrial Areas

- Per RCW 36.70A.110 industrial development must generally occur in UGAs
 - Industrial development requires urban-level water, sewer, and transportation
- New industrial zones are generally prohibited outside UGA boundaries
 - RCW 36.70A.367 authorized counties to create up to two industrial land banks outside existing urban growth areas
 - Grant has already established these in Ephrata and Quincy

Agricultural Lands

- Counties are required to conserve designated agricultural lands of long-term commercial significance and cannot convert them to non-agricultural uses.
 - Development regulations must prevent uses that remove designated ag land from production
 - Only limited non-agricultural accessory uses may be allowed and cannot convert more than one acre of land and are in close proximity to and do not interfere with an ongoing agricultural operation.

Industrial & Agricultural Lands Analysis

- **Economic opportunity**
 - Identify underutilized or strategically located lands that could support targeted economic development.
- **Zoning flexibility**
 - Explore whether limited, strategic adjustments could accommodate new business sectors without compromising core agricultural productivity.

Proposed Approach

- **Industrial Lands Component**
 - Inventory of existing industrial zones (location, capacity, infrastructure, constraints)
 - Gap analysis: Do we have adequate sites for targeted industries such as food processing, renewable energy, logistics, manufacturing, etc.?
 - Identify barriers such as utilities, environmental constraints, access, etc.
- **Agricultural Lands Component**
 - Review current agricultural zoning districts
 - Identify potential for limited flexibility in agricultural zones that permit value-added/agribusiness uses (processing, agritourism, renewable energy) without converting prime farmland.
 - Evaluate compatibility and regulations to prevent land use conflicts
- **Stakeholder Engagement**
 - Coordination with
 - Public outreach to landowners and business community

Next Steps

- Stakeholder engagement with GCEDC, port districts, Conservation District, WSU Extension, agricultural operators, major employers, etc.
- Develop policy recommendations for targeted code amendments
